ARCHITECT.

VICTORIA CROSS AWARDS

CHRISTIE, J. A.

Parcel Clerk, Traffic Dept., Euston. "For most conspicuous bravery when after a position had been captured, the enemy immediately made counter and bombing attacks up communication trenches. Lance-Corporal Christie, realising the position, took a supply of bombs over the top, proceeding alone about 50 yards in the open along the communication trench and bombed the enemy. He continued to do this alone in spite of very heavy opposition until a block had been established. Returning towards our lines he heard voices behind him; he at once turned back and bombed another party moving up the trench, entirely breaking up a further bombing attack. By his prompt and effective action he undoubtedly cleared a difficult position at a most critical time and saved many lives. Throughout he was subjected to heavy machine-gun fire and shell-fire. He showed the greatest coolness and a total disregard for his own safety."

SYKES, E.

Labourer, Engineering Dept., Mossley. "For most conspicuous bravery and devotion to duty when his Battalion in attack was held up about 350 yards in advance of our lines by intense fire from front and flank, and suffered heavy casualties. Private Sykes, despite this heavy fire, went forward and brought back four wounded—he made a fifth journey and remained out under conditions which appeared to be certain death, until he had bandaged all those who were too badly wounded to be moved. These gallant actions, performed under incessant machine-gun and rifle fire showed an utter contempt of danger."

WOOD, W.

Cleaner, Locomotive Dept., Stockport. "For most conspicuous bravery and initiative on 28th October, 1918, near Casa Van, Italy, when a unit on the right flank having been held up by hostile machine guns and snipers, Private Wood, on his own initiative, worked forward with his Lewis gun, enfiladed the enemy machine-gun nest, and caused 140 enemy to surrender. The advance was continued till a hidden machine gun opened fire at point blank range. Without a moment's hesitation, Private Wood charged the machine gun, firing his Lewis gun from the hip at the same time. He killed the machine-gun crew, and without further orders pushed on and enfiladed a ditch from which three officers and 160 men subsequently surrendered. The conspicuous valour and initiative of this gallant soldier in the face of intense rifle and machine-gun fire was beyond all praise."

W. GORQUODALE & CO. LIMITED, LONDON.

THE ABOVE IS A FACSIMILE OF THE POSTER EXHIBITED BY THE COMPANY AT ALL L.N.W.R. STATIONS

L. & N.W. Ry. AMBULANCE TRAIN

WAR WORK DONE BY THE LONDON & NORTH WESTERN RAILWAY

DURING the War 74,311 loaded special trains were run for Naval and Military purposes, exclusive of upwards of 16,000 special trains conveying coal to the Grand Fleet, &c.

For conveyance of wounded men in ambulance trains, refugees, and prisoners of war, an additional 13,318 special trains were provided.

It is estimated that, apart from troops conveyed by ordinary existing services, the London and North Western Railway carried upwards of 25½ millions of His Majesty's forces, together with the necessary complement of horses, guns, baggage, &c.

A total number of 3,288 of the larger description of tanks and 385 guns, varying from 50 to 189 tons each, were dealt with, together with approximately 13,937,000 tons of Government traffic.

IN order to assist in the urgent necessity for home-grown food, the Company provided 14,000 allotments for vegetable growing alongside the line, and issued a small guide giving instructions for planting, &c.

OWING to the large percentage of employees joining up, female labour was employed in many branches of Railway work, *i.e.*, ticket collecting, platform work, engine and carriage cleaning, at lathe, &c., work in the shops at Wolverton, Crewe, Earlestown, &c. 6,584 females were utilised in place of men.

CREWE LOCOMOTIVE WORKS provided two completely equipped armoured trains. Specially fitted up a large number of engines which were sent overseas for work on Military railways, also produced 138 Crewe tractors which were used on the light railways in the advanced battle area. Laid down a special plant for turning out copper driving bands for shells. Developed to a great extent the system of drop stamping, and so supplied the War Ministry with reliable forgings which had hitherto been troublesome castings and considered impossible as drop forgings, also with large quantities of fittings for 26-cwt. howitzers, aeroplanes, rifle fittings, &c. Reformed hundreds of thousands of cartridge cases, also made fuzes for shells, paravane cutter brackets (used for destroying sea mines), howitzer axles, &c. Provided lifting equipment, machine tools, &c., for overseas engine-erecting and repair shops, and kept in repair the engines sent abroad, and also the engines working on Military camp railways that were adjacent to the L. & N. W. Railway.

THE CARRIAGE WORKS AT WOLVERTON provided 368 vehicles for ambulance trains, and one complete train of 17 vehicles for the use of Military Head-quarters Staff. A large number of vehicles were altered for War purposes, and 400 20-ton goods wagons and 40 35-ton trolleys were built, as well as 1,350 general service road vehicles. 50 packing cases for aeroplanes,

2,550 ambulance stretchers, over 4,000,000 of fuze parts, gauges, gages, stampings, bomb forgings, &c., were made to order of the Ministry of Munitions.

676,000 18-pounder cartridge cases from overseas were repaired, and 48,000 18-pounder shells were painted.

THE WAGON WORKS AT EARLESTOWN altered for overseas War purposes 4,382 wagons; provided a large number of general service wagons, water-tank carts, cart cable drums; converted a large number of road delivery vans to War Office requirements, and supplied 2,400 picket posts and 20,000 picketing pegs. A large quantity of timber and ironwork and spare parts, for use of wagons overseas, was also provided at the Works, and the Ministry of Food was supplied with 205 insulated covered goods vans.

THE ENGINEERING DEPARTMENT provided for overseas purposes 56 miles of permanent way, in addition to 30,000 sleepers and 500 ballast wagons. About 36 miles of sidings and connections were laid down to deal with Munition, &c., traffic, and the War Ministry was supplied with large quantities of permanent way material, tools and wagons, for use in this country.

THE ELECTRICAL ENGINEER'S DEPARTMENT supplied a large number of telegraph signalling instruments for use overseas, and provided many telephones, lighting installations, &c., for Military purposes in this country. A number of machine tools were also supplied for overseas use.

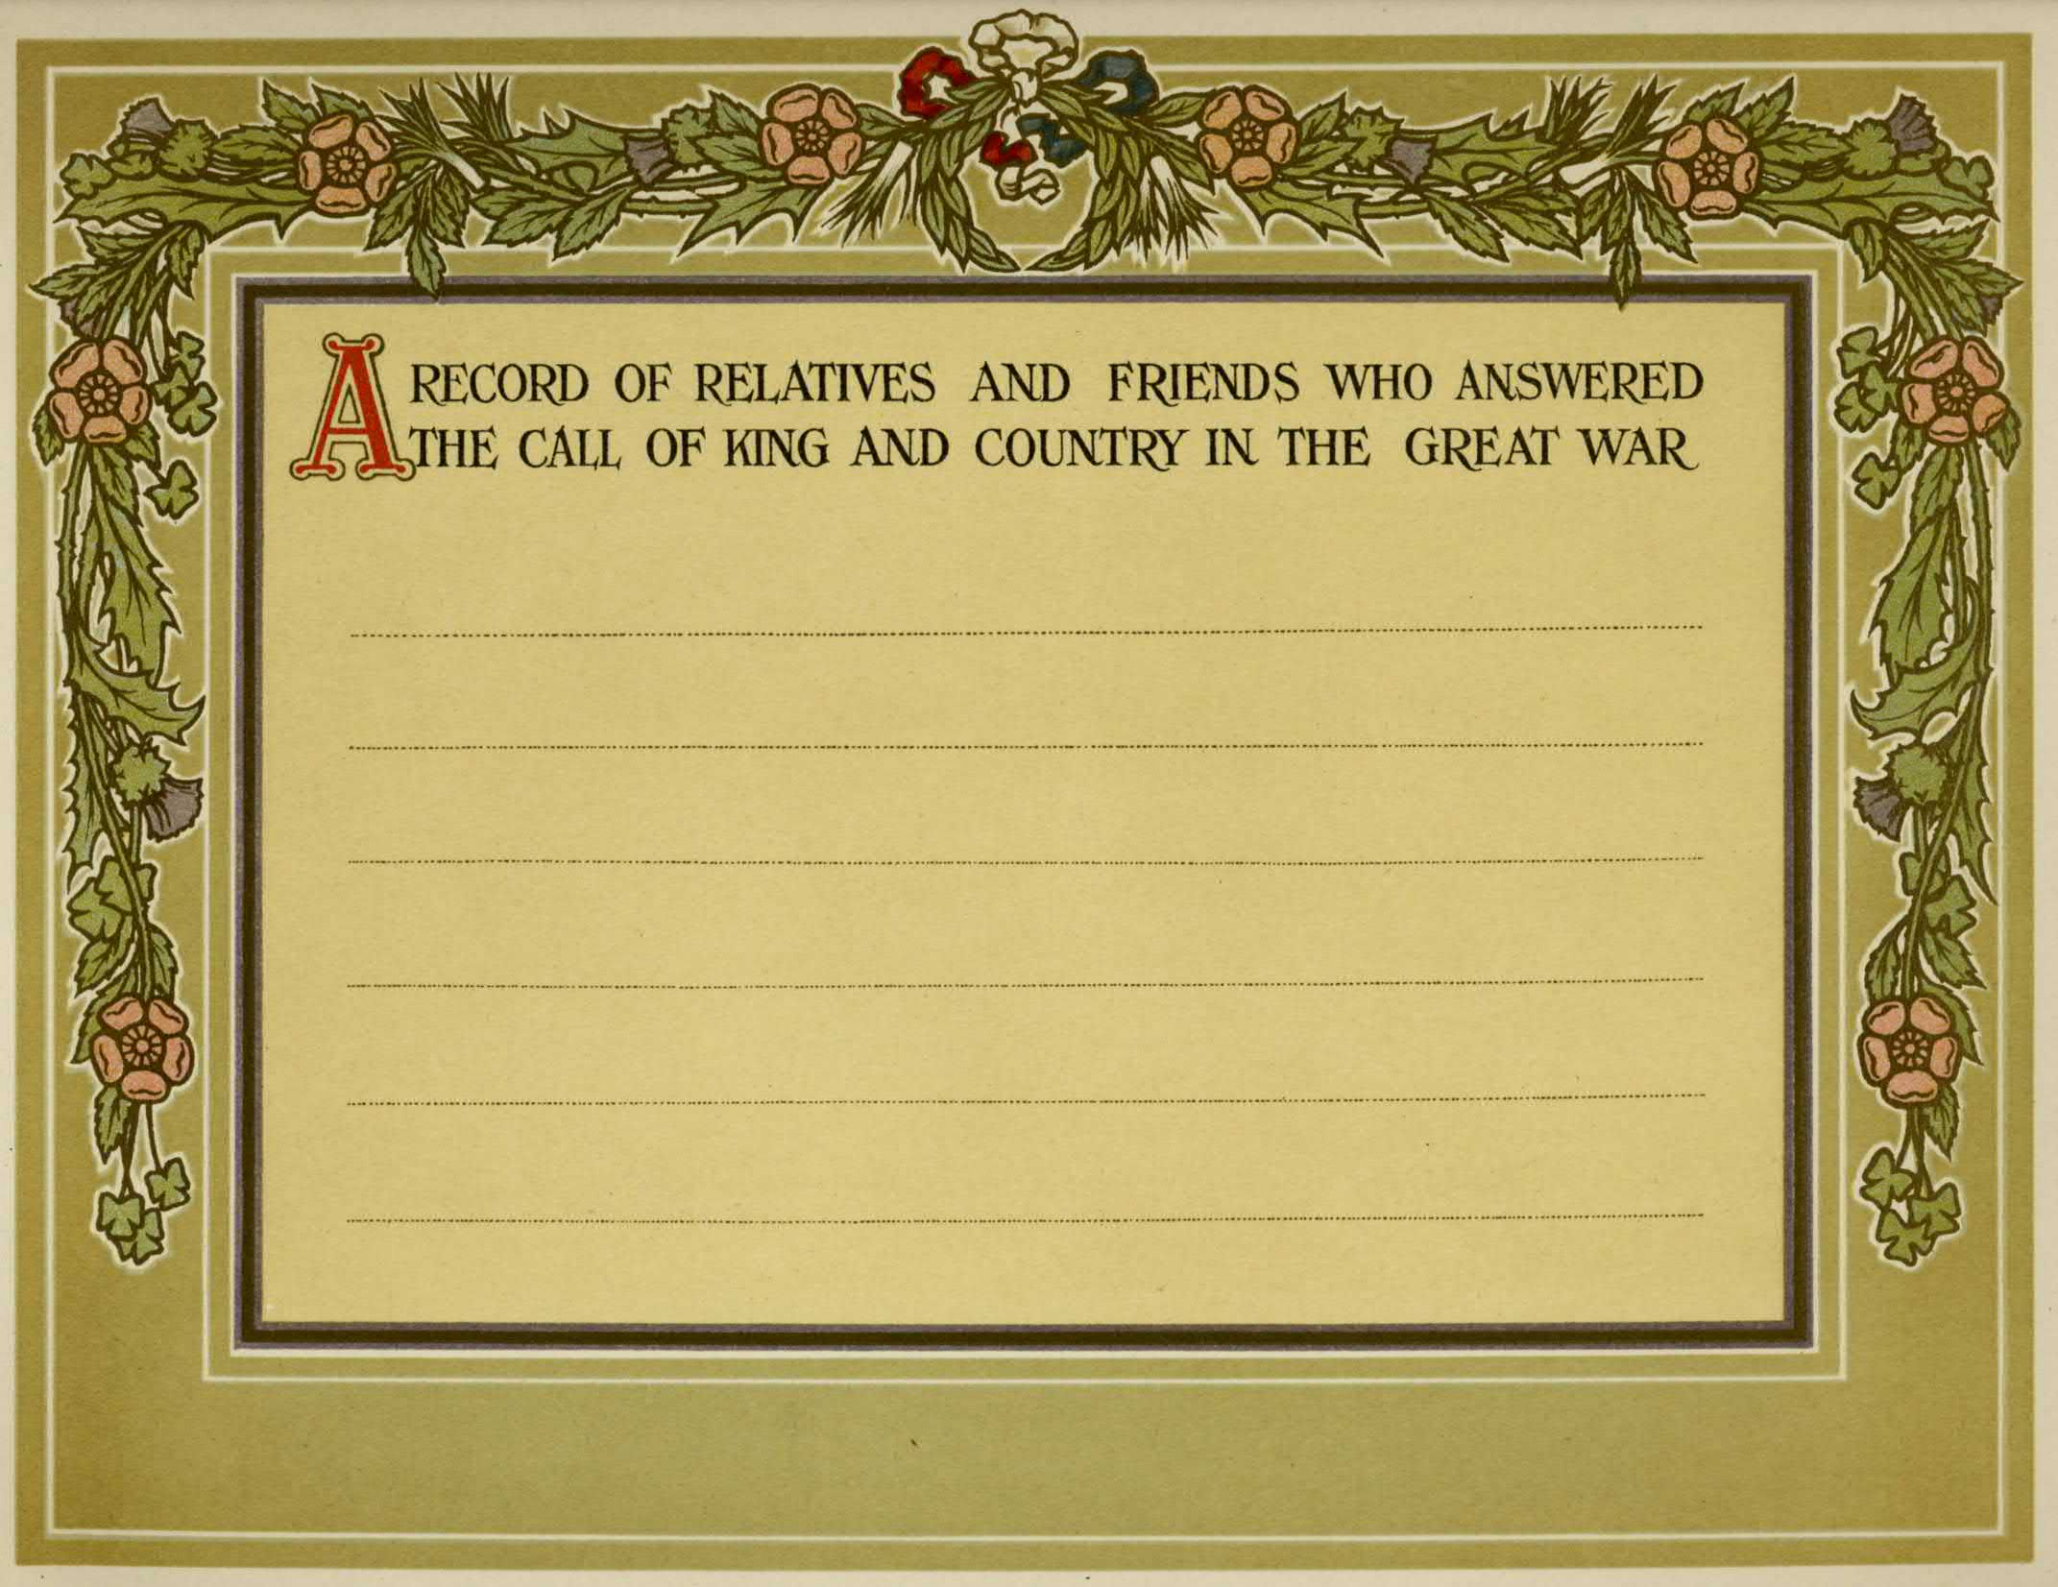

THE MARINE DEPARTMENT were requisitioned by the Admiralty at the outbreak of War to provide four ships from the Company's fleet. These were fitted with guns and sent for service with the Grand Fleet, &c.

Two of these were afterwards converted into Hospital Ships, and one was sunk by a mine off Dover, with a loss of three officers and 107 men, including wounded.

Another of the ships was torpedoed in the Mediterranean, with the loss of three officers and seven men. The remainder of the crew were imprisoned for 4½ months by the Senussi Arabs in the Libyan Desert, where, after suffering terrible privations, which resulted in the death of five, they were rescued by a British Expeditionary Force on armoured motor cars.

The remainder of the fleet were defensively armed, and, in addition to the heavy civilian traffic, conveyed across the Irish Sea 2,000,000 Naval and Military forces.

A Naval base was established at Holyhead, and the Company's Marine Department supplied a large number of His Majesty's ships with coal and oil fuel, and also attended to the numerous running repairs.
