

4mm Scale Wagon Products

This list has been collated to assist 4mm modellers with an interest in the LNWR or the LMS. Only LNWR diagram numbers are shown where a kit is in production or, if out of production, may be available S/H through eBay, specialist auction houses or traders of used kits.

The list is not exhaustive and may not include some kits and products that have been out of production for some time and do not appear to be readily available through the usual second hand sources. In addition, we have been unable to find accurate details of some out of production ranges. We try to keep the list reasonably up to date, but readers are advised to check with the supplier as to latest additions and availability - then please let us know

Please note we do not recommend any products, nor guarantee availability or suitability. The photographs of completed models should give some idea of the potential of these kits

Wagon Kits

Item	Supplier	Notes
D1 Single plank 15ft 6in open wagon	Ratio Ref 751.	Moulded plastic
D2 Two plank 15ft 6in open wagon	Ratio Ref 752 & part of PW wagon set Ref 575	Moulded plastic

Notes on kit components and lineage

Bill Bedford, D&S and The Model Wagon Co no longer manufacturer kits, but they may be found s/h.

[>Some D&S kits have been absorbed into the London Road Models range - with enhancements. Go to London Road Models site](#)

[PC Models Cattle wagon is now produced by Wizard Models. Go to Wizard Models site](#)

[Mousa models produce their kits when they have sufficient orders to warrant design and manufacturer. These show a status of in preparation - see their site for more details. They were originally produced in white metal by Bill Bedford Go To Mousa Models site](#)

Cambrian models have LNWR One Plank Open (D103) and LNWR Four Plank Open (D84) listed in the forthcoming section of their web site. Go To Cambrian Models site. Ratio kits reference numbers and wagon identification (diagram number) can be confusing. Some of their kits require conversion and may require additional parts such as transfers.
